OBJECTIVES

Detail-oriented professional with a strong foundation in **data analytics and backend development**, passionate about transforming raw data into actionable insights and building robust, scalable systems. Skilled in **data manipulation, visualization, and backend technologies** to support evidence-based decision-making and efficient application performance. Eager and motivated individual from Ghaziabad with a solid educational background, seeking to contribute analytical thinking, problem-solving abilities, and technical expertise to a dynamic team. Dedicated to **continuous learning** and applying innovative techniques to enhance **data-driven and backend-driven outcomes** that drive business growth..

EDUCATION

B. Tech [Computer Science Engineering (Artificial Intelligence and Machine Learning)]
NITRA Technical Campus, Ghaziabad

Nov 2022-Ongoing

EXPERIENCE

Junior Data Analyst (Tanvika Software Pvt. Ltd):

May2025-Sept 2025

Completed a hands-on Junior Data Analyst Training Program focused on data analysis, data visualization, and Python programming. Developed end-to-end data analysis projects using libraries like Pandas, NumPy, Matplotlib, and Seaborn. Worked with CSV, Excel, and SQL databases for data extraction and transformation tasks.

Back-End Developer (Campaigning Source Pvt. Ltd):

Sep 2025- Ongoing

Developing and maintaining RESTful APIs using Node.js (Express) and Python (Flask/FastAPI) for seamless frontend-backend communication.Implementing secure authentication and authorization using JWT and OAuth2 standards. Designing and optimizing database schemas in MongoDB / MySQL / PostgreSQL for efficient data storage and retrieval. Contributing to data-driven features by integrating analytical scripts in Python for real-time insights. Continuously learning and implementing modern backend architectures and data handling techniques to enhance performance.

CERTIFICATION COURSE/ TRAINING

Python Training Program (Internshala):

July 2023-Aug 2023

Completed a comprehensive Basic Python Training Program covering core programming fundamentals including variables, data types, loops, functions, and file handling.

Advance Python Course (Udemy) :

Nov 2024-Jan 2025

Completed an intensive Advanced Python training program focusing on object-oriented programming, decorators, generators, and multithreading. Built scalable Python applications with in-depth understanding of memory management, performance tuning, and error handling.

Data Analysis (Appwars Technologies Pvt. Ltd):

June 2025- Sep 2025

Completed a data analyst internship program focused on data wrangling, visualization, and business insights using tools like Excel, SQL, and Power BI. Worked on real-world datasets to uncover insights and present findings using Power BI and Python during a 4-months data analyst internship.

PROJECTS

A Virtual AI Assistant using openai, flash, requests etc:

Developed a Virtual AI Assistant using OpenAI API, Flask, and Requests, capable of answering queries, performing web searches, and automating daily tasks.Integrated Flask backend with a conversational AI engine powered by OpenAI for real-time natural language understanding. Integrated Flask backend with a conversational AI engine powered by OpenAI for real-time natural language understanding.

Mern Stack Blog Platform with Authentication and Content Management:

Designed and developed a dynamic Blog Management Platform enabling users to create, edit, and comment on posts with real-time updates.Built a role-based access control system (Admin/User) to manage content publishing and moderation. Implemented SEO-friendly routing and metadata for improved search engine visibility. Deployed backend APIs using Express.js, connected to a MongoDB database, and handled image uploads and content validation.

A fully functional employee detail dashboard:

A responsive and interactive Employee Dashboard built using Plotly Dash, designed to manage and visualize employee records. The application provides CRUD operations, real-time visual analytics, and persistent data storage using CSV.

LANGUAGES

Python, SQL
Node.js
React

FRAMEWORKS & TOOLS

Flask,PyTorch,OpenCV,Git/Github
REST APIs, Google Sheets API

VISUALIZATION

Tableau,Power BI,
Matplotlib,Seaborn,
Excel(Pivot Tables,
Charts)

ANALYTICS & ML

Data Cleaning,EDA,
Hypothesis Testing,
Predictive Modeling,
CNNs, NLP

DATABASES

MongoDB
SQL
